ANALYSIS ONLY

Repricing and profit-floor rules

These rules guide current pricing decisions. They never rewrite purchase costs or the COGS already recorded on completed sales.

Cost basis for analysis

Average remaining cost

Specific acquisition requires a source when pooled inventory cannot identify one item.

Minimum price difference

\$ 2

Ignores small market changes below this dollar amount, even when the percentage threshold is reached.

Price rounding

Nearest \$1

Flag above market by

15%

Required gross margin

10%

Pricing review summary

Daily

Creates one in-app owner alert per day or week when the repricing queue has items. It does not refresh prices or send marketing email.

Flag below market by

CUSTOMER INVENTORY

Public inventory browser

Let customers browse available inventory, asking prices, and binder or case locations from their phone.

Inventory browser visibility

Only available, in-stock items marked for sale are published. Costs and internal notes remain private.

Public inventory is available

Customer-facing message

Browse our available inventory and ask us for the listed binder.

Save public inventory

Your customer QR code

Print this for a booth sign or display it on another screen.

- 1

Publish

Enable the public inventory browser.
- 2

Share

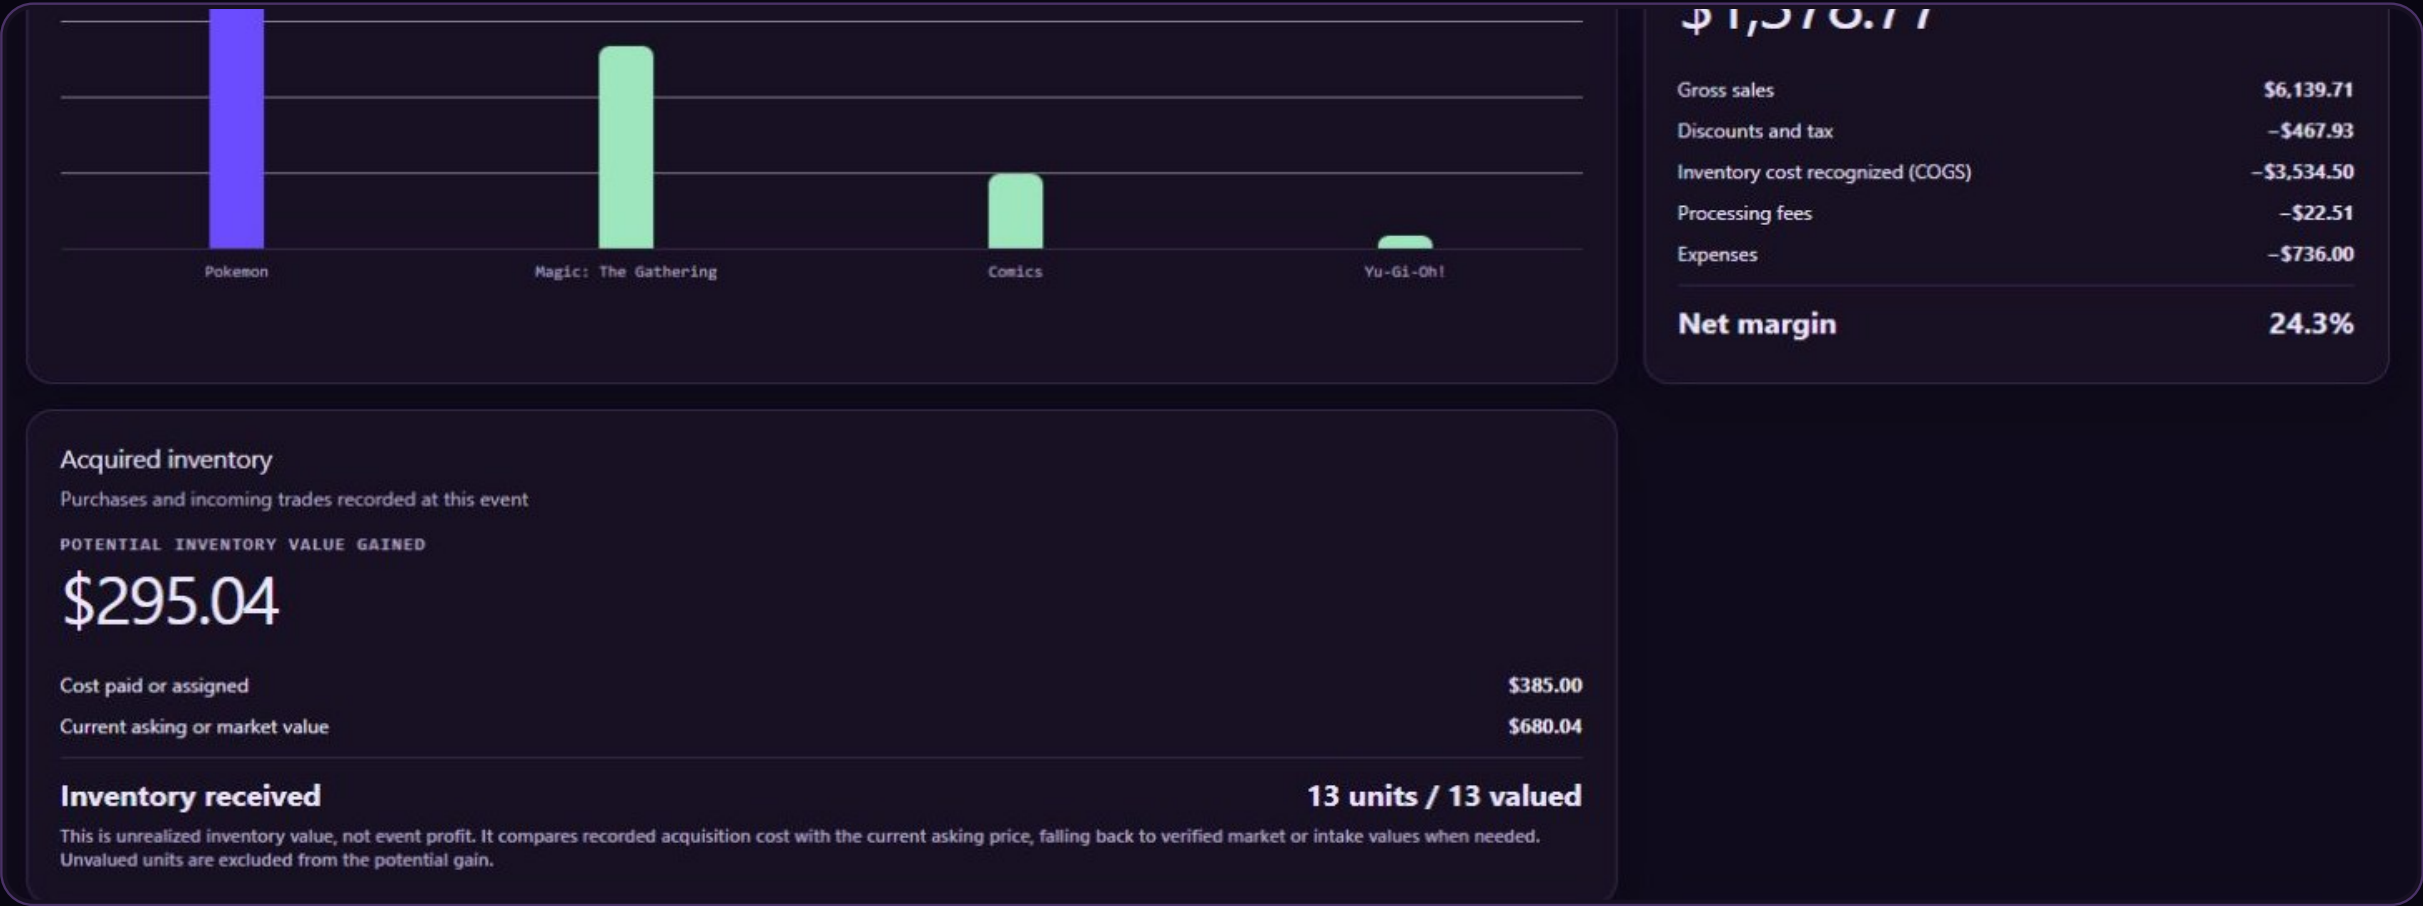

Display or download the QR code.
- 3

Serve

Customers ask for the item by location.

Track event profitability

Pro adds expenses and unlimited completed-event history to the core reports.

- 1

Attribute
Use the active event on transactions.
- 2

Expense
Record booth, travel, supplies, and other event costs.
- 3

Review
Check expense-adjusted profit and acquired inventory.

Use flexible tender

Pro supports balanced manual split payments while connected terminal payments remain single-tender.

Current sale

Receipt number is assigned when the sale completes

📄

Search or tap an item to begin.

1

Build sale

Confirm items and prices.

2

Split

Use up to five positive manual tenders.

3

Balance

Tender total must equal the sale total.

Vendor OS | Pro Tier Guide

8

Pro operating checklist

A simple routine for a serious solo vendor.

BEFORE AN EVENT

Refresh inventory, review the pull list, and set the active event.

AT THE TABLE

Use Scan and Fast Sale; display the customer inventory QR.

TAKING CARDS IN

Use Purchases or Trades so cost basis stays accurate.

AFTER THE EVENT

Enter expenses and review the full event result.
